# Clinical Report 2016

Department of Obstetrics and Gynaecology

## **MESSAGE FROM THE HEAD OF DEPARTMENT**

Our Department provides services in general obstetrics and gynaecology, as well as in subspecialty services including reproductive medicine, gynaecological oncology and maternal-fetal medicine. Separate reports are available in reproductive medicine, gynaecological oncology and prenatal diagnosis where more details can be found.

In 2016, there were a total of 3842 deliveries in our Unit, which was comparable with previous years. Our Caesarean section rate was 27.9% and instrumental deliveries by forceps or vacuum extraction accounted for another 9.6%, which also remained similar as in previous years. The perinatal mortality rate was 6.1 per 1000 live births, which again was comparable with previous years. These met the acceptable standard for a tertiary care centre.

The total number of gynaecological admissions was 9097, which remained similar to previous years. The number of day cases has increased tremendously in the past three years, which accounted for about half of the admissions. This reflects the current trend in minimising the duration of hospital stays for most gynaecological conditions and procedures. The disease pattern in gynaecology has also remained stable. From this year onwards, with the change in the gynaecological discharge coding system by the Hong Kong College of Obstetricians and Gynaecologists, major abdominal surgical procedures for benign and malignant conditions are reported together. A detailed breakdown of surgical procedures for gynaecological malignancies can be found in the Gynaecological Oncology Annual Report of our Department.

Hereby, I would like to take this opportunity to thank Dr. Raymond Li for compiling this annual report. I would also like to thank the following colleagues for their contribution: Mr. Rice Yeung (Information Technology Department, Hospital Authority) for assisting in obstetric data management, Dr. Mimi Seto for the obstetric and neonatal statistics, Dr. Vincent Cheung for the general gynaecology statistics and Dr. Siew-Fei Ngu for the gynaecological oncology statistics.
