Message from Division Head

The gynaecological oncology division of the Department of Obstetrics and Gynaecology, the University of Hong Kong, has been providing training and service in gynaecological oncology for over 50 years. Our unit is a tertiary referral center for both the private and public sectors in Hong Kong. We also accept referrals from the hospitals in Macau. With collaboration with other departments, our scope of services includes colposcopy, chemotherapy, radiotherapy, surgery and palliative care.

Our unit is a recognized training center for gynaecological oncology by the Hong Kong College of Obstetricians and Gynaecologists (HKCOG) and the Royal College of Obstetricians and Gynaecologists (RCOG). In 2017, we had Dr. Victoria Chai joining our team as a subspecialist trainee in gynaecological oncology. We would also like to congratulate Dr. Siew Fei Ngu for completing her subspecialist training in gynaecological oncology after spending one year at Addenbrooke's Hospital, Cambridge University Hospitals in the United Kingdom. Apart from training subspecialist fellow, we also provide gynaecological oncology training for basic and higher specialist trainees in Obstetrics and Gynaecology.

Our unit has a long-standing collaboration with the Family Planning Association (FPA) in Hong Kong to improve the provision of cervical smear screening for our population. In 2017, we jointly organized the 8th cervical smear taking course which comprised of both lectures and practicum to train professional cervical smear takers in Hong Kong.

In February 2017, we are delighted to have Prof. Sean Kehoe from the United Kingdom to visit us as the external examiner for the final MBBS examination. In addition to helping us with our examination, Prof. Kehoe also shared with us the update in ovarian cancer management and potential research idea during his visit.

I would like to take this opportunity to thank our team members and our collaborators for their contribution.
